SUMMARY

Motivated B.Tech Computer Science student with hands-on experience building and deploying full-stack MERN applications, including CGPA Booster (real-time study rooms, file sharing, Google OAuth) and an AI-powered code reviewer. Skilled in React, Node.js, Express, MongoDB, Socket.io and REST API development, with a strong foundation in Redux Toolkit and Tailwind CSS. Quick learner who enjoys solving real problems through code, and is looking for a Full Stack / MERN Development internship to contribute to a team and grow as an engineer.

TECHNICAL SKILLS

Languages: C++, JavaScript
Frontend: HTML, CSS, JavaScript, React, Redux Toolkit, Tailwind CSS
Backend: Node.js, Express.js, REST APIs, WebSockets (Socket.io), JWT, OAuth (Google)
Database: MongoDB (Atlas)
Tools & Platforms: Git, GitHub, Docker, Render, Vercel, Cloudinary
Core Concepts: Data Structures & Algorithms, MVC Architecture, API Design, Version Control

PROJECTS

CGPA Booster

Personal Project

MERN Stack, Socket.io, Cloudinary, Google OAuth | Live: cgpa-booster-rosy.vercel.app | [GitHub](https://github.com)

- Built a full-stack web app for college students with a credit-weighted SGPA/CGPA calculator, a section to upload and search notes and PYQs, and live study rooms with chat.
- Implemented real-time study rooms with Socket.io, including a live count of active users. Files are stored on Cloudinary and only the uploader can delete their own file.
- Built authentication with email/password (JWT, bcrypt) and Google OAuth, and added rate limiting to protect the API.
- Deployed the frontend on Vercel, the API on Render and the database on MongoDB Atlas. Debugged production issues from server logs, such as an upload failure that looked like a CORS error but was a server crash.
- Kept the production bundle at 417 KB (135 KB gzipped) and fixed around 47 accessibility issues.

AI Code Reviewer

Personal Project

MERN Stack, Google Gemini API | Live: ai-code-reviewer-client-fvz3.onrender.com

- Built a full-stack web app that reviews user-submitted code using the Google Gemini API, scoring it on cleanliness, time complexity, space complexity, and logic.
- Implemented a language-select-then-submit flow, letting users choose a programming language before pasting code for review.
- Designed secure user authentication with JWT, protecting review history and user sessions.
- Built RESTful APIs with Node.js and Express, with MongoDB for persisting users and review data.

CERTIFICATIONS

Advanced Software Engineering Job Simulation — Walmart Global Tech (via Forage), 2026
Responsive Web Design — freeCodeCamp, 2026
Google AI Essentials & Google Prompting Essentials — Coursera, 2026

EDUCATION

Bachelor of Technology (B.Tech), Computer Science & Engineering

2025 – 2029

Radha Govind University | 1st Semester CGPA: 8.0

Class XII (CBSE)

2025

Sree Ayyappa Public School | 67%

Class X (CBSE)

2023

D.A.V Public School | 80%
